**Module: Supporting Decisions with Assessment**  
**Exercise for Interim Assessment**

---

Interim assessment reports of student performance are a common part of parent-teacher conferences in the elementary grades in the United States. On the next page, you will find a report for 1st-grader, Selena Student. Selena completed the interim assessment at the beginning of the school year (i.e., within the first three weeks), in accordance with her school district's policies and practices. The report shows her scores in Mathematics and Reading for this test administration as well as the three administrations from kindergarten. The report shows total scores, with some comparisons to peer student groups, and markers that convey Selena's performance in relation to grade-level expectations (for fall administration) on different content strands within Mathematics and Reading.

Imagine that you are Selena's teacher, and are preparing for upcoming parent-teacher conferences, approximately two months into the school year. Plan your communication with Selena's family at the upcoming conference, so that you can make the best use of the test administration. Consider major takeaways from the report, what it might say and not say about Selena, and the best way to communicate with Selena's family.

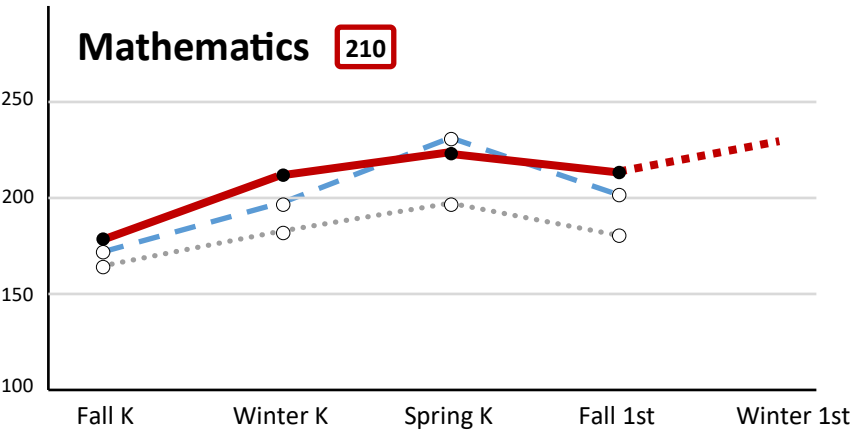

Student Growth Report — Selena Student

Test Administration Fall

School: Three Forks Elementary

Grade : 1

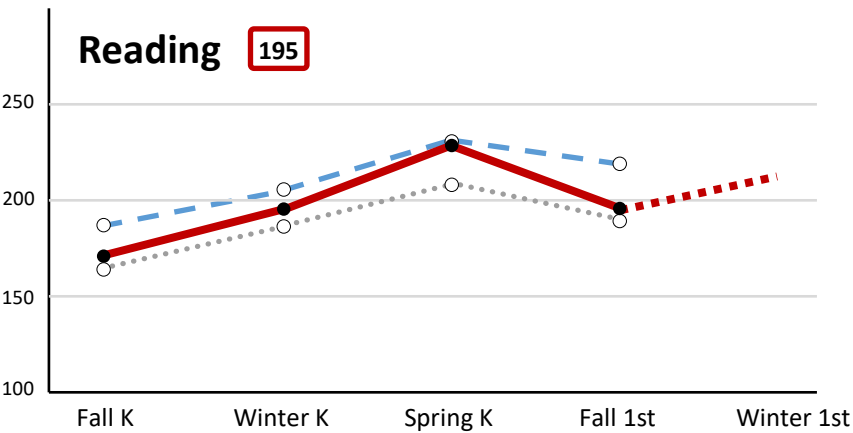

District: Intermountain ISD

Student Score	
Projected Growth	
School Dist. Avg.	
National Avg.	

A child’s score can vary if they take the same test several times. If your child was tested again, they would likely earn a score between 195 and 225.
